Detail-oriented Compensation and Data Analyst with expertise in salary and job trends, data analysis, and machine learning. Skilled in reviewing compensation requests and providing data-driven salary suggestions. Proficient in advanced analytical techniques to uncover actionable insights. Adept at collaborating with cross-functional teams to drive informed decision-making. Ready to join a dynamic organization and contribute as part of a talented team.

Work History

Compensation & Benefits Officer

C.A.T. Group

May 2022 – October 2023

- Conducted market surveys and benchmark studies to establish competitive compensation strategies.
- Conducted job analysis for 60+ employees to create and maintain job descriptions for each position, ensuring accuracy.
- Designed and implemented compensation programs, enhancing employee engagement.
- Partnered with senior leadership to design and implement pay structures that support organizational objectives.
- Collaborated with hiring managers to set salary ranges for 500+ new hires, promotions, and internal transfers ensuring competitive offers.
- Managed complex compensation projects within tight deadlines

HCMS Officer/ Acting Compensation & Benefits Officer

C.A.T. Group

August 2020 – May 2022

- Developed organization charts using Visio and created succession planning databases, streamlining the organizational structure and enhancing workforce planning.
- Managed departmental budgets, optimizing resource allocation and reducing costs by 15%.
- Improved performance management processes, resulting in a 20% increase in employee productivity.
- Designed and implemented policies, procedures, and forms for organizational development, ensuring compliance and improving operational efficiency.
- Contributed to succession planning by identifying high-potential employees and creating development plans to ensure leadership continuity.

Software Developer

C.A.T. Group

July 2018 – August 2020

- Developed MySQL and Oracle 10g databases, built HR profiles web

Skills

Data Science Skills:

- **Programming Languages:**
Python: Proficient in using Python for data analysis, manipulation, and machine learning.
- **Data Analysis & Visualization:**
Pandas, NumPy: Expertise in data manipulation and analysis.
Matplotlib, Seaborn: Skilled in creating insightful visualizations.
Tableau: Proficient in developing interactive dashboards and visual reports.
- **Machine Learning & Modeling:**
Scikit-Learn: Experienced in implementing and tuning machine learning models.
TensorFlow: Proficient in building and training deep learning models.
PyTorch: Experienced in implementing machine learning models for research and production.
XGBoost: Expertise in gradient boosting algorithms for regression and classification tasks.
Hyperparameter Tuning: Skilled in using Grid Search and Randomized Search for model optimization.
- **Statistical Analysis:**
Statistical Testing: Proficient in hypothesis testing and statistical significance.
Regression Analysis: Experienced in linear and logistic regression modeling.
- **Big Data Technologies:**
SQL: Proficient in querying and managing databases.
Hadoop, Spark: Knowledgeable in big data processing frameworks.
- **Data Wrangling & Preprocessing:**
Handling Missing Data: Skilled in various imputation techniques, including KNNImputer and SimpleImputer.
Feature Engineering: Expertise in creating new features to enhance model performance.
- **Development Tools:**
Jupyter Notebooks: Proficient in using for

application, and improved software efficiency by resolving coding issues.

- Enhanced user experience by designing and implementing user-friendly interfaces and optimizing database queries for faster data retrieval and processing.
- Worked on ERP Document Control application, including adding, editing, and deleting documents, and contributed to positive team environment through effective communication and collaboration.
- Practiced various programming languages such as HTML, CSS, JavaScript, jQuery, Ajax, PHP, and Oracle Application Server.

Education

Post-Graduate Certificate in Data Science

January 2025

LearningFuze, 9200 Irvine Center Dr #200, Irvine, CA 92618

Bachelor of Science in Management Information Systems

January 2019

Lebanese University - LU, Lebanon

Projects

House Prices - Advanced Regression Techniques

Developed multiple linear regression models, plus neural networks models to predict house prices using python. In addition, I've built a Streamlit web page to get predictions depending on user's need.

- Cleaned and preprocessed dataset: handled missing and bad values, feature scaling, and encoding.
- Created new features to enhance model performance.
- Designed, evaluated, and tuned models; selected the best using RMSE.

Home Credit Default Risk - Classification Techniques

Developed classification models, plus neural networks models, to predict credit default risk using python.

- Cleaned and preprocessed dataset: handled missing values, encoding.
- Designed, evaluated, and tuned models; selected the best using AUC-ROC.

Recommender Systems - Amazon Product Recommendations

Developed a recommendation system for Amazon products (books) and created a Streamlit webpage where the user can put his id to get books recommendations.

- Implemented collaborative filtering and content-based filtering algorithms.
- Evaluated the recommendation system using metrics like RMSE

Deep Learning Project - CIFAR-10 Image Classification

Developed image classification models using the CIFAR-10 dataset to identify objects in images.

- Built and trained convolutional neural networks (CNNs) using TensorFlow.
- Evaluated model performance using metrics such as accuracy, precision, recall, and F1 score utilizing the classification report function.

interactive data analysis and prototyping.

Git: Experienced in version control and collaborative development.

Compensation & Benefits Analyst skills:

- Salary Benchmarking
- Performance management
- Budget Planning
- Job Description and Evaluation
- Proficient in Excel, Microsoft Word, PowerPoint, Visio, etc.

Soft Skills:

- Problem Solving: Strong analytical and problem-solving abilities.
- Communication: Effective in presenting complex data insights to non-technical stakeholders.
- Team Collaboration: Proven ability to work collaboratively in cross-functional teams.

Languages

Arabic - Native/Bilingual

English - Native/Bilingual

French - Proficiency

Certifications

- Python for Data Science and AI, Coursera, 09/26/24
- Excel Essentials for Data Analytics, Coursera, 08/29/24
- Data Analytics Essentials, Coursera, 08/23/24
- Master Google Sheets, Udemy, 08/01/24
- Workday Basics and Beyond Basics, Coursera, 08/01/24
- Human Resources: Compensation and Benefits, LinkedIn Learning, 07/01/24
- Artificial Intelligence and Business Strategy, LinkedIn Learning, 07/01/24
