Skills

DATA SCIENCE SKILLS:

Programming Languages:

Python: Proficient in using Python for data analysis, manipulation, and machine learning.

Data Analysis & Visualization:

Pandas, NumPy: Expertise in data manipulation and analysis.

Matplotlib, Seaborn:

Skilled in creating Insightful visualizations.

Tableau: Proficient in developing interactive dashboards and visual reports.

Machine Learning & Modeling:

scikit-Learn: Experienced in implementing and tuning machine learning models.

TensorFlow: Proficient in building and training deep learning models.

PyTorch:

Experienced in implementing machine learning models for research and Production.

XGBoost: Expertise in gradient boosting algorithms for regression and classification tasks.

Hyperparameter Tuning: Skilled in using Grid Search and Randomized Search for Model optimization.

Detail-oriented Compensation Consultant with several years of progressive experience in designing job architectures and salary structures, salary benchmarking, job evaluation, base pay and incentive program design. Strong background in internal and external international market analysis, merit and variable pay cycles, and equity assessments. Proven ability to partner with HR and business leaders to deliver compliant, competitive, and data-driven compensation solutions aligned with organizational strategy. Experience with compensation tools and survey, Workday and advanced Excel.

PROFESSIONAL EXPERIENCE

2025-03 -
Current

Compensation Consultant

AAA Auto Club Enterprises, Costa Mesa, CA

- Research and provide recommendations on policies and programs that are consistent with the goals and strategies of the company and comply with federal and state guidelines
- Provide counsel and support to HR staff on all matters related to compensation and to other management
- Evaluate the annual merit increases and variable pay process and make recommendation for process improvement.
- Perform internal and external salary analysis to determine appropriate salary levels, and participate in, conduct and evaluate salary survey data
- Re-design existing Job Architecture and Salary Structure to improve alignment, transparency, and market competitiveness.
- Perform job evaluations of new and existing jobs and develop new job classifications and salary levels
- Identify and raise issues regarding market equity and competition in order to ensure the ability to attract and retain talent in a competitive marketplace
- Monitor changes and trends in compensation and propose strategies to address the impact of these trends.
- Development of Base Pay and Market Rates for benchmark and non-benchmark jobs
- Exploring and developing recommendations to address potential market equity issues
- Development of new and revision/review of existing job descriptions.

2018-07 -
2023-10

Compensation & Benefits Analyst

C.A.T. Group, Lebanon

- Led a team to harmonize and standardize the job architecture frameworks and salary structures across different Middle Eastern Countries and Nigeria, supporting consistent job leveling, market pricing, and compensation practices across multiple international markets.

Statistical Analysis:

Statistical Testing: Proficient in hypothesis testing and statistical significance.

Regression Analysis: Experienced in linear and logistic regression modeling.

Big Data Technologies:

SQL: Proficient in querying and managing databases.

Hadoop, Spark: Knowledgeable in big data processing frameworks.

Data Wrangling & Preprocessing:

Handling Missing Data: Skilled in various imputation techniques, including KNNImputer and SimpleImputer.

Feature Engineering: Expertise in creating new features to enhance model performance.

Development Tools:

Jupyter Notebooks: Proficient in using for interactive data analysis and prototyping.

Git: Experienced in version control and collaborative development.

COMPENSATION ANALYST SKILLS:

- Salary Benchmarking
- Performance management
- Budget Planning
- Salary Surveys
- Job Architecture
- Salary Structure
- Global, Executive & Sales Compensations
- Job Description and Evaluation
- Proficient in Excel, Microsoft Word, PowerPoint, Visio, etc.

SOFT SKILLS:

- Problem Solving: Strong analytical and problem-solving abilities.
- Communication: Effective in presenting complex data insights to non-technical stakeholders.
- Team Collaboration: Proven ability to work

LANGUAGES

ARABIC - Native / Bilingual

ENGLISH - FLUENT

FRENCH - FLUENT

- Conducted compensation market surveys and benchmark studies to support competitive pay strategies.
- Conducted research and analysis of compensation data from various sources such as Willies Towers Watson (WTW), to support the market pricing process during the Job Evaluation
- Collaborated with hiring managers and Talent Acquisition to establish competitive salary ranges for new hires, promotions, and internal transfers, and provide recommendations for salary adjustments as needed
- Participated in designing fair and attractive bonuses in coordination with organization's strategic direction
- Performed job analysis by coordinating and meeting with employees and managers to create and maintain accurate job descriptions for each position in organization; ensuring descriptions accurately reflect work being performed by incumbents
- Designed and implemented compensation programs to enhance employee engagement and retention
- Partnered with senior leadership and stakeholders to design pay structures aligned with organizational objectives
- Created performance appraisal form and collaborate with managers to evaluate employees' performances fairly and effectively in order to help them improve their work relations and productivity
- Managed complex compensation initiatives within tight deadlines
- Defined fair, equitable, competitive total compensation, and benefits package by creating comparative tables for new or transferred employees
- Developed organization charts and succession planning databases using Visio and Excel
- Managed departmental budgets and achieved a 15% cost reduction through optimization
- Improved performance management processes contributing to a 20% productivity increase
- Designed and implemented compensation, benefits, and organizational development policies and procedures
- Supported succession planning by identifying high-potential employees
- Implemented an Asset Management System.

CERTIFICATIONS

- Certified Compensation Professional (CCP) – In Progress
- Creating Impact Through Total Rewards – WorldatWork 2026
- Understanding the Total Rewards Regulatory Landscape - WorldatWork 2026
- MarketPay Certification –Payscale 2025
- First Aid and CPR Course, Lebanese Red Cross, 2022
- GC LAU Model United Nations Certification, Lebanese American University (LAU), 2015
- Python for Data Science and AI, Coursera
- Excel Essentials for Data Analytics, Coursera
- data Analytics Essentials, Coursera
- Master Google Sheets, Udemy
- Workday Basics and Beyond Basics, Coursera
- Artificial Intelligence and Business Strategy, linkedIn Learning

2017-07 -
2018-07

Software Developer

- C.A.T. Group, Lebanon*
- Developed MySQL and Oracle 10g databases and HR profile web applications
 - Improved application performance through query optimization and code enhancements
 - Supported ERP document control systems and collaborated with cross-functional teams
 - Worked with HTML, CSS, JavaScript, jQuery, Ajax, PHP, and Oracle Application Server

EDUCATION

- 2018-07

Bachelor of Science: Management Information Systems

Lebanese University - Beirut, Lebanon
- 2025-01

Post Graduate Certificate: Data Science

LearningFuze - Irvine, California

PROJECTS

House Prices - Advanced Regression Techniques

Developed multiple linear regression models, plus neural networks models to predict house prices using python. In addition, I've built a Streamlit web page to Get predictions depending on user's need.

- Cleaned and preprocessed dataset: handled missing and bad values, feature scaling, and encoding.
- Created new features to enhance model performance.
- Designed, evaluated, and tuned models; selected the best using RMSE.

Home Credit Default Risk - Classification Techniques

Developed classification models, plus neural networks models, to predict credit default risk using python.

- Cleaned and preprocessed dataset: handled missing values, encoding.
- Designed, evaluated, and tuned models; selected the best using AUC-ROC.

Recommender Systems - Amazon Product

Recommendations

Developed a recommendation system for Amazon products (books) and created a Streamlit webpage where the user can put his id to get books recommendations.

- Implemented collaborative filtering and content-based filtering algorithms
- Evaluated the recommendation system using metrics like RMSE

Deep Learning Project - CIFAR-10 Image

Classification

Developed image classification models using the CIFAR-10 dataset to identify objects in images.

- Built and trained convolutional neural networks (CNNs) using TensorFlow.
- Evaluated model performance using metrics such as accuracy, precision, recall, and F1 score utilizing the classification report function.
